

CHIEMENA IFEANYICHUKWU IBEKU

mena.ibeks@gmail.com | +1(908)-427-0964 | <https://www.linkedin.com/in/menaibeku/> | Houston, TX

EDUCATION

University of Massachusetts, Amherst | Graduation Date: May 2027 | GPA: 3.9 | Amherst, MA

- Bachelor of Science in Informatics with concentration in Data Science and Business Administration Minor
 - Dean's List 2023-2025
-

SKILLS

Technical Skills: Java, Python, Flutter, QGIS, R, HTML, CSS, C, ServiceNow, JavaScript, React Native, SQL

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Introduction to Programming

PROFESSIONAL EXPERIENCE

Amazon | Software Developer Intern | May 2025-August 2025

- Designed and developed a background image selection feature for Alexa Music using React for the frontend and Java for the backend, enabling millions of users to personalize their music interface on Alexa-enabled devices.
- Built a scalable ViewConfig-based backend integrated with AWS S3, and CloudFront to store and deliver media assets with 100% uptime and optimized performance monitoring via CloudWatch.
- Enhanced the user visual experience by offering over 10 background options, resulting in a 15% increase in feature engagement during beta testing.

UMass Amherst Cranberry Station | Data Analytics Research Intern | June 2024-August 2024

- Leveraged multispectral and infrared drones to collect data on cranberry plant growth, development, and nutritional factors, allowing for comprehensive analysis to identify the factors that promote or inhibit cranberry growth rates.
- Utilized QGIS and AgiSoft Metashape for data analysis and visualization, identifying factors influencing plant growth rates and aiding in strategic decision-making that is contributing to significant improvements in cranberry crop production growth.
- Deployed sensor technology to determine nutritional data of cranberry plants, assisting over 300 Massachusetts cranberry farmers in optimizing crop production by over 20% and guiding senior management decisions for enhanced agricultural productivity.

National Center for Technology and Dispute Resolution | Full Stack Development Intern | Sept. 2023 - Jan. 2024

- Utilized open-source UI software, Flutter, to create a disaster response app for medical responders, focusing on continuous improvement and modification.
 - Implemented solutions to enhance communication efficiency in low connectivity areas by over 10%, improving disaster response coordination.
 - Developed and integrated geolocation services to efficiently identify support hotspots.
 - Supported the development of applications for security-based community resilience efforts.
-

CODING PROJECTS

Ordering System | Technical: Python

- Developed an ordering system for restaurants, featuring a user-friendly interface, streamlined discount code application, precise order tracking, and automated invoice creation.

Vending Machine Model | Technical: Python

- Developed a vending machine model using Python, encompassing the entire vending process, including user interface interactions, inventory management, currency handling, and transactional workflows.

Statistical Modeling of Wearable Technology Data for Calorie Expenditure Prediction | Technical: R

- Developed statistical models using Linear Regression and K-Nearest Neighbors to analyze wearable technology data, identifying key predictors of calorie expenditure through data preprocessing, model evaluation, and performance metrics.
-

LEADERSHIP EXPERIENCE

UMass Amherst Office of Residential Life and Student Services | Resident Assistant | August 2024-present

- Managed and supported a diverse community of over 300 freshman students, fostering a safe, inclusive living environment through conflict resolution and event planning.

National Society of Black Engineers | New England Zone Treasurer | May 2024-Present

- Manage annual budget of about \$10k and spearhead fundraising initiatives, liaising with over 10+ sponsors and ensuring robust financial support

UMass Amherst CICS Community Outreach Student Team | Volunteer | Oct. 2023-present

- Leading outreach initiatives in computer science, organizing events for over 200 participants, and driving a 30% increase in STEM engagement among underrepresented youth through empowerment workshops.
-
